Shelves & racking

More space for organisation

- Optimal use of space thanks to flat, 25-mm thick shelves that are in height adjustable (increments of 25mm)
- Variable widths and depths to ideally fit your space
- Extremely flexible, easy to swap out accessories thanks to the standardised perforations.

Tambour cupboards

Internal roof shelf:

A hanging file shelf which holds up to 50 kgs is fitted into the top of each cupboard to add strenght, flexibility and finish to the cupboard. Not only is it useful it ensures that no stress is put on the top of the cupboard which in turn adds longevity to your cupboard.

Tambour doors:

The tambour doors are made of 30mm wide slats that together slide freely to the cupboard width ensuring maximum access at all tiems. The handles are fitted neatly into the two full height epoxy coated steel plates which are colour keyed to the shell colour. A secure lock with one folding and one flas key is provided for added security. If required the doors can be easily removed.

Base shelf and feet:

Fits neatly in the bottom of the cupboard giving level access to contents. The door runner fits flush between the cupboard shell and bottom shelf giving a neat appearance and seamless lines. The four feet can be adjusted to 15mm max from inside with cupboard with the tool provided.

Door handles:

Made of polypropylene the two recessed handles match the cupboard shell colour and come with high quality 90 degree cam locks with one flat and one folding numbered key. Skeleton keys are available on request.

Cupboard base:

The base of the cupboards has reinforcement bars for extra strength. Attached to the base are four leveling feet.

Fixed and pull out shelf:

Fixed hanging file shelf with a fully extendable pull out reference shelf beneath.

Pull out filing cradle:

With and without anti-tilt mechanism for A4 and F5 hanging files. If fitting more than one pull out anti-tilt is recommended.
