Chameleon quality

The core of the Chameleon range is formed by the whiteboard. A Chameleon whiteboard can be recognized for its quality, which is visible in four ways:

1. Durability: Chameleon whiteboards are 10 mm thick with a robust, water-repellent MDF core (FSC-certified, see sustainability).
2. Surface: Chameleon whiteboards feature high-quality magnetic ceramic steel, recognizable by a smooth surface without imperfections. We offer a lifetime warranty on writing and erasing on all ceramic steel surfaces. Below is an overview of our ceramic steel surface options.
3. Finish: Chameleon whiteboards are machine-cut and then hand-finished. We pay great attention to the finishing process.
4. Installation: Chameleon uses a unique TÜV-certified mounting system that works with magnetic plates.

LIFETIME WARRANTY

Type	Surface + code	Colour	Description	Writing / erasing	Panel edge colour	Maximum dimension
High Gloss	High Gloss HG100		Most popular whiteboard surface with a high gloss finish	Whiteboard markers / dry erase	White lacquered	1180×2980 mm / 1480×2380 mm
Satin Tones	Satin Snow S200		White whiteboard with a somewhat matte surface, also suitable for projection	Whiteboard markers / dry erase	White lacquered	1180×2980 mm
	Satin Stone S201		Grey whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Grey lacquered	1180×2980 mm
	Satin Aqua S202		Blue whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Blue lacquered	1180×2980 mm
	Satin Leaf S203		Green whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Green lacquered	1180×2980 mm
	Satin Almond S204		Beige whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Beige lacquered	1180×2980 mm
	Satin Blossom S205		Pink whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Pink lacquered	1180×2980 mm
Chalk	Chalk Graphite C300		Colourfast, durable surface with a soft and even colour distribution	Chalk / dry erase	Black lacquered	1180×2980 mm
	Chalk Canopy C301		Colourfast, durable surface with a soft and even colour distribution	Chalk / dry erase	Black lacquered	1180×2980 mm / 1480×2380 mm
Projection *	Projection		Very matte surface, suitable for projection	Whiteboard markers / wet erase	White lacquered	1180×2980 mm / 1480×2380 mm

* Not included in product-level.

Chameleon surfaces

What is Ceramic steel?

All Chameleon surfaces on this page feature a top layer of ceramic steel. This is an enamel layer that is comparable to glass in terms of hardness and smoothness. Thus, it is equally scratch-resistant and has the same long lifespan. Chameleon offers the following ceramic steel surfaces:

High Gloss

This is the best-selling whiteboard surface. The surface has a high gloss level, though not as high as glass whiteboards. The advantage of the glossy surface is that markings are perfectly visible on it. This makes it ideal for presentations and situations where reading from a distance is necessary, such as in schools.

SatinTones

SatinTones is a ceramic steel surface with a matte appearance. The surface radiates calmness and is perfectly readable from all angles. Moreover, this surface is available in six subtle colour shades. SatinTones is a good alternative to glass whiteboards.

Chalk

Choosing a chalkboard has specific reasons. The main reason is that nuances can be applied with chalk by pressing harder or softer. The Chameleon chalkboard surface is, like the whiteboard surfaces, made with ceramic steel. As a result, Chameleon chalkboards are also perfectly erasable for life. The matte surfaces are available in green and grey.

Projection

This extremely matte surface shows no reflections at all. Projecting onto this board provides the best possible image quality from projectors. The board is writable, but erasing is significantly more challenging. However, using whiteboard spray when erasing will clean the board effectively.

Mounting

Chameleon whiteboards are delivered with the TÜV certified Chameleon magnetic mounting system. Magnetic mounting is very easy, and we supply a specified assembly drawing with each custom Chameleon whiteboard wall we sell.

Ceramic steel colour: High Gloss - HG100

1.1 Sharp

Writing / Whiteboards / Sharp

Simple and minimalist, that's the power of Sharp. This whiteboard comes in its most basic form: straightforward, without a frame, and white on all visible sides. The rectangular whiteboard is available in 11 different sizes and can be hung both horizontally and vertically.

Ceramic steel colour: Satin Leaf - S203

1.2 Sharp Oak

Writing / Whiteboards / Elements / Sharp Oak

The Chameleon Sharp Oak is a whiteboard with a sleek silhouette and a natural look. The lacquered solid oak frame accentuates the graphic lines of the design and creates a stylish contrast with the ceramic steel writing surface – available in High Gloss, Chalk, or the matte SatinTones finish.

1.5 Round

Writing / Whiteboards / Round

Round shapes are a timeless aspect of design. They remain relevant in ever-changing design landscapes. In addition to clean lines and angles, round shapes bring a sense of softness and harmony to a space. This is precisely what Chameleon Round does as a whiteboard. The perfectly round whiteboard features black lacquered edges. The board is available in 3 sizes and 9 different surface options.

Ceramic steel colour: Satin Leaf - S203

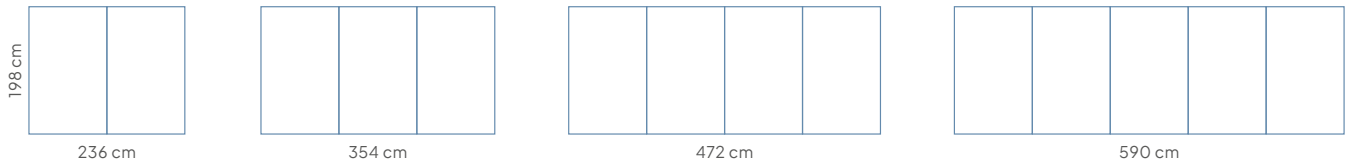

1.7 Sharp Wall

Writing / Whiteboards / Sharp Wall

Large writing wall in its most basic form, with right angles and without a frame. The edges are finished in white. Thanks to the razor-sharp edge finish, the panels fit together precisely with minimal seams. This Sharp Wall is available in 4 different sizes and 9 surface options. It can also be combined with Sharp Acoustics, see pages 38 - 39.

Ceramic steel colour: Satin Blossom - S205

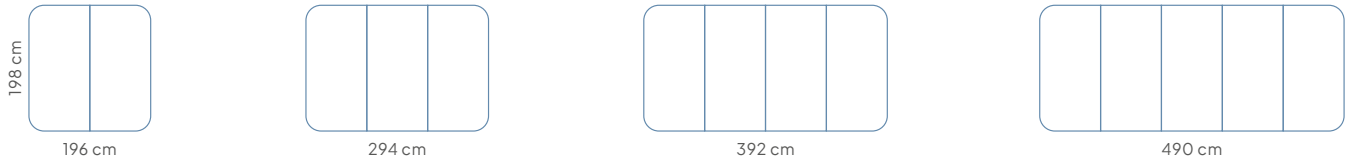

1.8 Curve Wall

Writing / Whiteboards / Curve Wall

The soft curves make this whiteboard wall a striking appearance. The Chameleon Curve Wall is a complete whiteboard wall that is 2 meters tall and 2, 3, 4, or 5 meters wide, consisting of multiple panels.

Ceramic steel colour: High Gloss - HG100

1.9 Custom whiteboard wall

Writing / Whiteboards / Custom whiteboard wall

Every organization is unique. With a Chameleon custom whiteboard wall, this uniqueness can be accentuated. Create a magnetic writing surface with complete freedom in shape and size. It allows you to think big and unleash your creativity.

You can:

- Make it wall-filling (precisely in millimeters, keeping in mind to allow for some flexibility due to uneven walls).
- Add creative shapes, such as a skyline at the top.
- Include your logo as a cutout with a full-colour print behind it.
- Have a cutout made for a TV screen on or within the whiteboard.

A quotation is provided for this product.

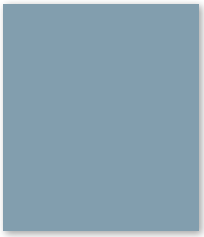

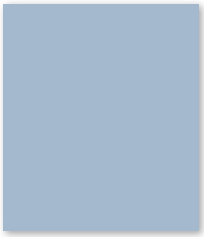

LOGO

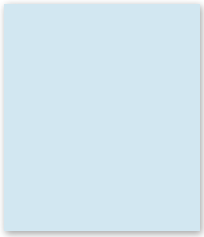

Chameleon quality

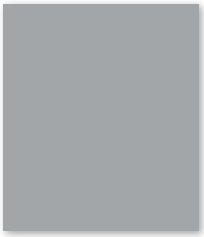

Chameleon Glassboards and Glass Walls feature extra clear, low-iron glass. As opposed to normal glass, these products do not have a green hue. As such, the 18 different glassboard colours will come out perfectly.

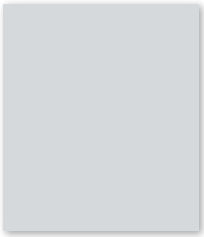

- Material: tempered safety glass, extra clear.
- Thickness: 4–mm glass with 0.4–mm galvanised backing sheet.
- Wall depth: 5 mm.
- Use: The panels are suitable for dry-erase markers and are magnetised for glassboard magnets.
- Finish: All edges feature a matte finish.
- Installation: The panels can be mounted on the wall using our certified magnetic mounting system. This makes it easy to ensure the panels are level and allows you to quickly connect multiple panels.
- Colours: Chameleon Glassboards and Glass Walls are available in 18 different colours. The colour is enameled (baked in) on the back of the plates, preventing discoloration.

1.10 Sharp Glassboard

Writing / Glassboard / Sharp Glassboard

Colour usage is a powerful tool in interior design because it strongly influences the atmosphere and feel of a space. Warm colours like red, orange, and yellow can create a cozy and lively ambiance, while cool colours like blue and green have a calming effect. They can also be combined with Sharp Acoustics, as seen on pages 38 - 39.

Chameleon Sharp Glassboard is a magnetic glass writing board made of extra-clear safety glass. The 18 soft colour options (p. 28) are carefully selected to complement contemporary interior designs. Black whiteboard markers are highly legible on all glass board colours.

Size (cm)	Art. no. Just - G105	Art. no. Other colours

1.11 Sharp Glass Wall

Writing / Glassboard / Sharp Glass Wall

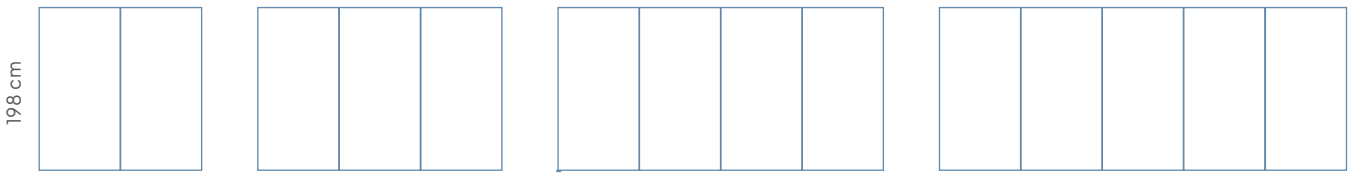

The 18 soft pastel shades (p. 28) of the Chameleon Sharp Glass Wall, due to their versatility, complement various interior design styles. They subtly add warmth or create a visually cooler atmosphere in a space. They can also be combined with Sharp Acoustics, as seen on pages 38 - 39.

The Sharp Glass Wall is a magnetic glass writing wall made of extra-clear safety glass. It is available in 8 sizes and consists of multiple panels. Black whiteboard markers are highly legible on all glass board colours.

9 + 18 mm PET felt

Application

The 9 mm PET felt is used for the Sharp and Curve Walls and the 9 mm Single Layer Covering. The 18 mm PET felt (2 layers of 9 mm) is used for the Elements and the Creative Panels.

Material

Chameleon Acoustics is made of 100% recyclable polyethylene terephthalate (PET), a part of which is derived from recycled PET bottles. These materials are processed to create sound-dampening felt with a soft structure.

Thickness and dimensions

The thickness of the PET felt panels is 9 or 18 mm, and the maximum panel size is 120 x 240 cm.

Fire resistance

EN13501	B-s1, d0

Acoustics

When mounting directly on the wall. The complete test results are available upon request.

9 mm: αw 0,25 / SAA 0,3
18 mm: αw 0,45 / SAA 0,59

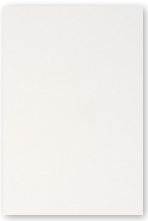

Mounting

Chameleon Acoustics products are mounted on the wall in 3 different ways.

- Magnetic: quick, easy, and re-mountable. The panels (Elements) can be easily mounted and aligned relative to each other.
- With kit (not included): preferred for complete wall coverage (Walls and Coverings). The initial adhesion is flexible enough to allow the panels to be slightly adjusted during the final positioning.
- Velcro: ideal for smaller Creative Panels; quick and easy.

Colours

The 9 and 18 mm PET felt from Chameleon Acoustics is made of colour-ingrained felt. If the product is cut to a creative shape, this means the colour is also visible on the cut edges. We have made a selection of 21 colours, featuring a range of greys and browns.

2.1 Sharp Acoustics

Add colour and sound-absorbing properties to your whiteboard. These 9 mm thick PET felt panels come in 21 colours (p. 37). The various panel sizes are compatible with Chameleon Sharp Wall (p. 22 - 23) and/or Chameleon Sharp Glassboard and Sharp Glass Wall (p. 30 - 33).

Optionally, one of the 4 available v-cut patterns can be chosen to be incorporated into the panel. The pattern will then be cut into the panel as shown in the line drawings next to it.

2.7 Creatives

Acoustics / Walls / Creatives

This set of 4 acoustic panels hangs as one artistic work on th e wall. The product is characterized by a line pattern of V-groove cutouts that run across all panels. The acoustic panels also significantly improve the acoustics in the room. Available in 21 different colours (p. 37).

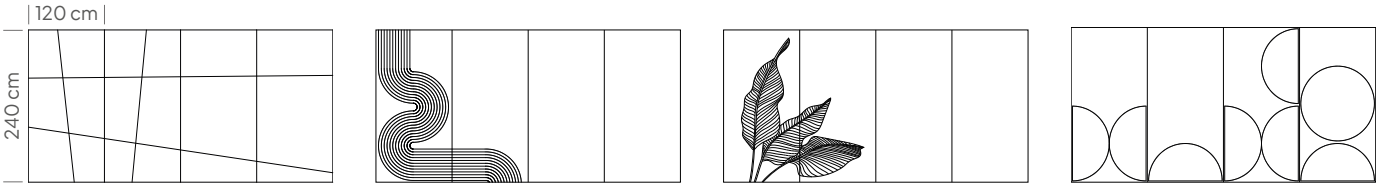

+ Unique cutout for offices and schools.
+ Usable as a pin board.
+ Contributes to better acoustics.

2.8 9 mm Single Layer

Save on plastering and achieve excellent acoustic values in office and school buildings. Chameleon 9 mm Single Layer is a wall-covering PET felt surface with a choice of various beautiful patterns and 21 colours (p. 37). The 9 mm thick panels are cut so that the seam transition from one panel to the next perfectly blends into the pattern.

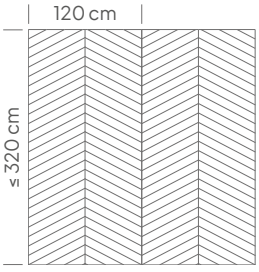

+ Save on plastering and painting.
+ Optically one seamless surface.
+ Various cut patterns enhance aesthetic value.
+ Achieve excellent acoustic values.

2.9 Creative V-Layer Panels

A set of 4 acoustic panels in a fixed size that can be easily and quickly used to cover large wall surfaces. The 18 mm V-Layer Panels consist of two layers of 9 mm PET felt. Different colours can be chosen for the front and back layers. The V-groove in this panel is 12 mm deep, making both the front and back layers visible. The sides of the panels are finished with a bevel cut. Fitting pieces can be easily cut to size on location with a knife and a cutting ruler.

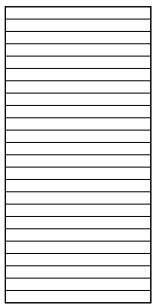

Refer to page 37 for the available colour options.

2.10 Creative Layer Panels

Acoustics / Coverings / Creative Layer Panels

A set of 4 acoustic panels in a fixed size that can be easily and quickly used to cover large wall surfaces. The 18 mm Layer Panels consist of two layers of 9 mm PET felt. In the front layer, a pattern is fully cut out, making the back layer clearly visible, creating a beautiful combination of 2 colour layers. In the case of two identical colour layers, a 3D effect is achieved without a colour difference. The sides of the panels are finished with a bevel cut. Fitting pieces can be easily cut to size on location with a knife and a cutting ruler.

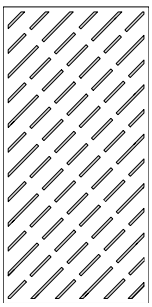

Refer to page 37 for the available colour options.

2.11 Creative Education Panels

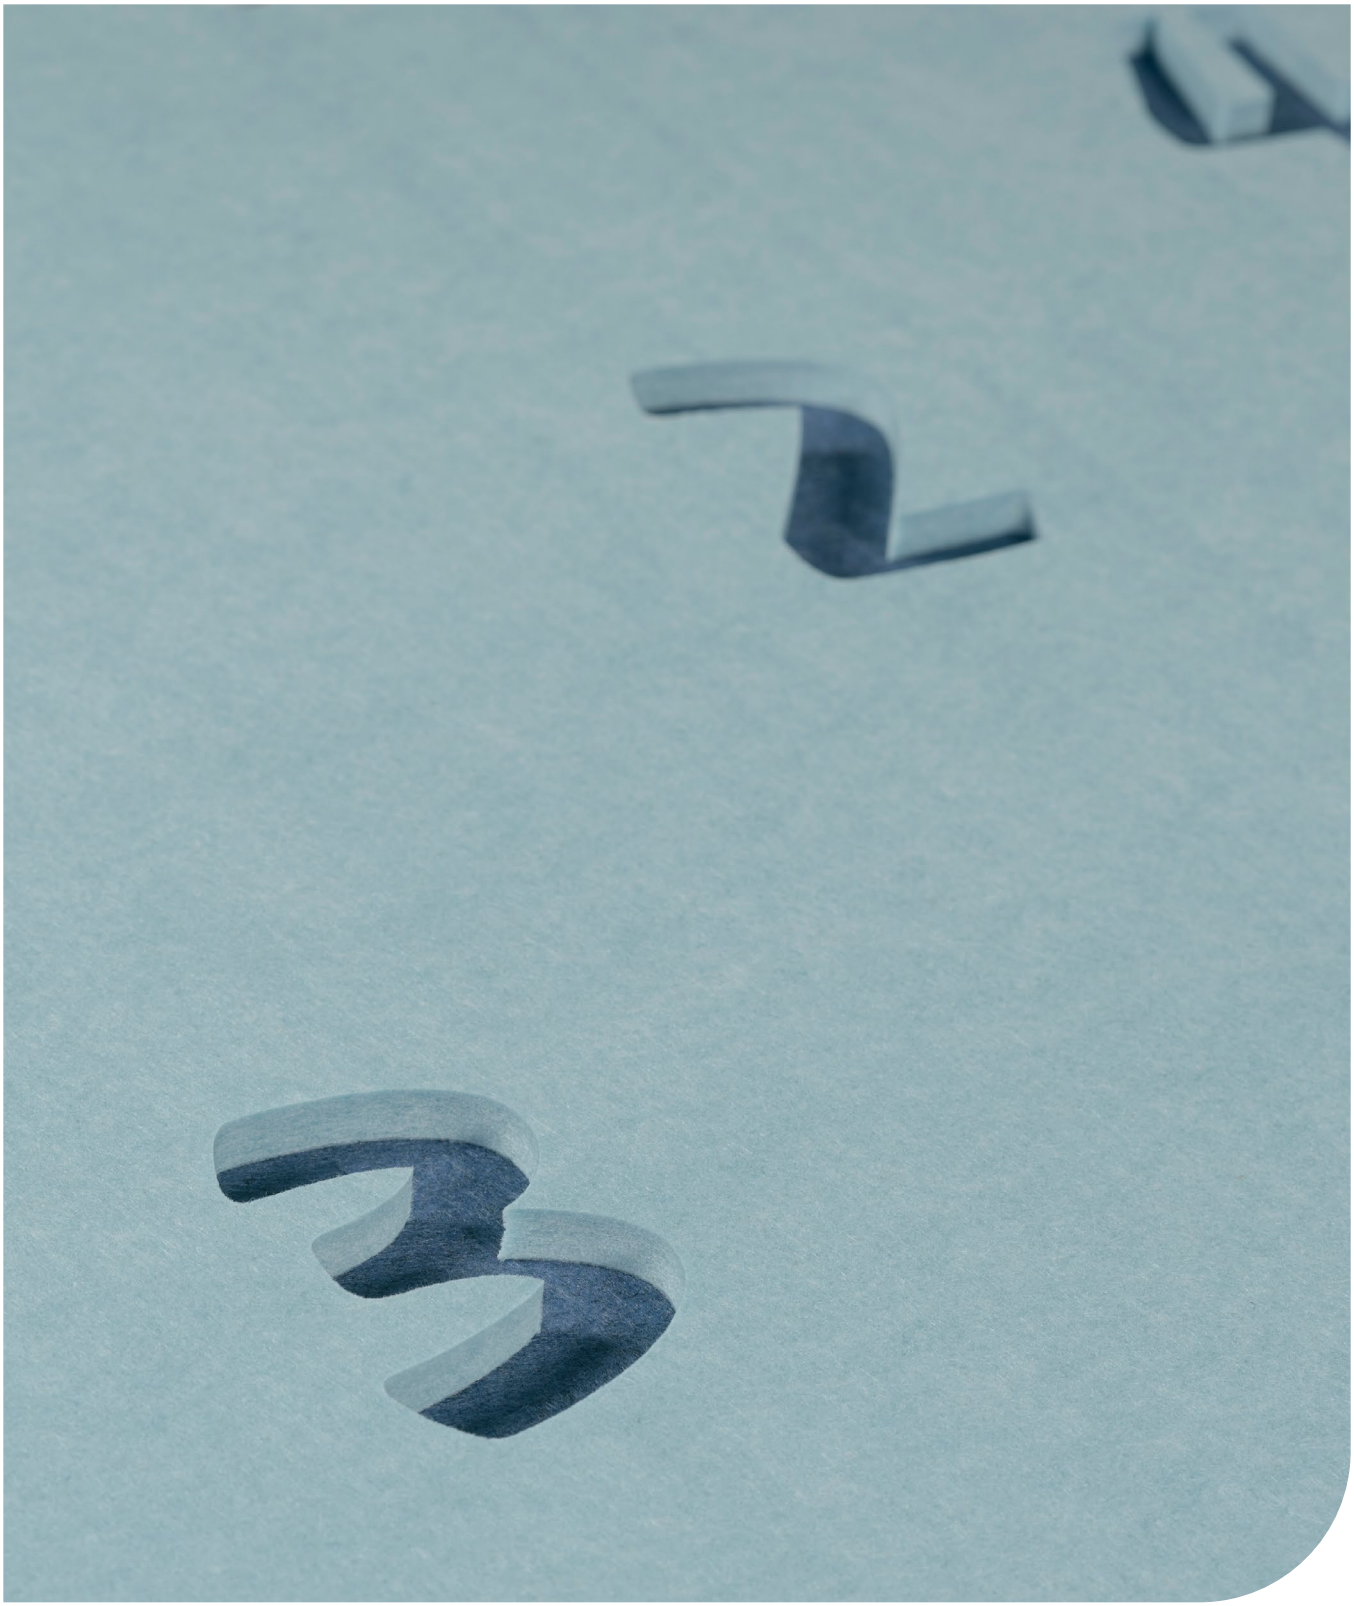

Acoustics / Coverings / Creative Education Panels

A set of 4 acoustic panels in a fixed size that can be easily and quickly used to cover large wall surfaces. The 18 mm double-layer Education Panels consist of two layers of 9 mm PET felt. In the front layer, a pattern is fully cut out, specifically designed for (primary) education and childcare centers. The cutout in the front layer makes the back layer clearly visible, creating a beautiful combination of 2 colour layers. In the case of two identical colour layers, a 3D effect is achieved without a colour difference. The sides of the panels are finished with a bevel cut. Fitting pieces can be easily cut to size on location with a knife and a cutting ruler.

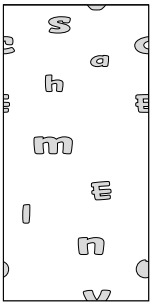

Refer to page 37 for the available colour options.

25 mm PET felt

Application

The 25 mm PET felt is used for 25 mm Optimal.

Ecological footprint

Chameleon 25 mm Optimal consists of 100% recyclable PET felt, partly made from recycled materials. The material has a small ecological footprint because it is produced locally.

- 100% recyclable PET (of which a part is recycled).
- Free of formaldehyde.
- ÖKO-TEX® standard 100 product class 1 certified (no harmful substances).
- European production with fibres manufactured in Europe.
- Volatile Organic Compounds (VOC) DIN EN 16516: German AgBB (2021), French VOC class A+.

Sizes and weigth

- Material thickness 25 mm.
- Maximum panel size 1500 x 3000 mm.
- Weight 4 kg/m2.

Fire resistance

Tested according to DIN EN 13501-01.
B-s1-d0.

Acoustics

From 1000 Hz, an absorption value of αw 0.65 can be achieved (when mounted directly onto the wall).

Maintenance

Brush with a soft brush or duster. Wet cleaning is not recommended.

Mounting

The Chameleon 25 mm Optimal panels are mounted with adhesive (not included): the preferred choice for complete wall covering. The initial adhesion is flexible enough to allow the panels to be slightly adjusted during the final positioning of the panels.

Colours

Chameleon can apply almost any NCS, PMS, RAL, or other colour system—approximately—on the felt surface. With lighter colours, the felt structure remains visible on the surface, while it is less visible with darker colours. This way, the best-suited colour shade can be chosen for any interior. To select the right colour shade and experience the effect on the felt surface, we warmly invite you to visit the Chameleon Showroom in Geldrop. (Chameleon 25 mm Optimal is partially made from recycled materials. Small colour variations may occur between different batches.)

Full colour print

An acoustic panel with full colour (photo) print. Using sublimation technology, images are printed on Chameleon 25 mm Optimal with razor-sharp quality. The colour white is displayed as transparent. This means that the basic colour of the felt, including the felt structure, becomes the most visible.

2.12 25 mm Optimal

Acoustics / Coverings / 25 mm Optimal

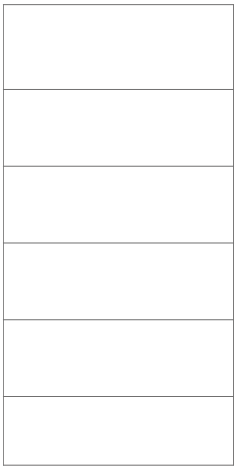

This product allows Chameleon to live up to its name. 25 mm Optimal is a highly sound-absorbing wall covering that can be made in any colour. The colour is approximately printed on the panel. There are four different V-cut designs to choose from, which are cut into the panel. In this V-groove, the gray base colour of the panel is visible instead of the printed surface colour.

- 25 mm thick PET felt with excellent acoustic properties.
- European-produced PET felt, partially made from recycled fibers.
- Base colour of PET felt is light grey, colour is printed on the surface. The printing colour may slightly vary from the chosen colour on each panel.
- The sides of the panel are beveled (bevel-cut), concealing seams in the V-cut pattern.
- Mounting with adhesive.

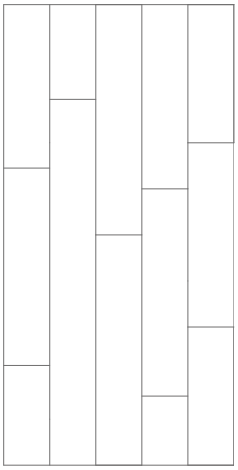

For this product, a quotation is offered based on wall dimensions. The wall is filled with multiple panels, each measuring up to 150×300 cm. The required height is custom-cut and delivered, with the pattern for patterns OPT111 and OPT112 being scaled accordingly. For patterns OPT109 and OPT110, the patterns are cut to fit the height. In terms of width, the panels maintain a width of 150 cm. Filler pieces are made to complete the wall.

2.13 Creative Divider Panels

A double-layer panel of 18 mm, consisting of two layers of 9mm PET felt. Different colours can be chosen for the front and back layers. The pattern cutout goes through both layers. This creates a see-through effect when the panel is freely hanging in the space.

The Divider Panels are supplied with steel cables for hanging from both fixed and suspended ceilings. They can be hung up to 2 meters below the ceiling with an adjustable connector.

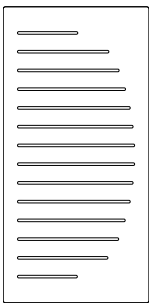

Refer to page 37 for the available colour options.

DP01

4.2 Mobile

Portable and mobile / Mobile

Mobile whiteboards contribute to a dynamic work environment by fostering collaboration and interaction.

Chameleon Mobile is designed with a minimalist approach. The aesthetically elegant skate wheels are recessed into the frame and allow the whiteboard to move in a single direction (instead of swivel wheels). This design ensures that the frame remains sturdy while writing.

Size (cm)	Art. no.	Surface side 1	Surface side 2
192,4 x 88,7	15200.422	PET felt panel	High Gloss whiteboard

192,4 x 88,7	15200.202	High Gloss whiteboard	High Gloss whiteboard

4.3 Momentum

Portable and mobile / Momentum

The beauty of spontaneity. The Chameleon Momentum is a portable, double-sided whiteboard weighing only 10.9 kg. Its lightweight design makes it excellent for impromptu meetings. Additionally, the 25 mm thick frame takes up very little storage space.

Size (cm)	Art. no.	Colour
190,5 x 75,7	15400.001	Blue
190,5 x 75,7	15400.002	White
190,5 x 75,7	15400.003	Grey

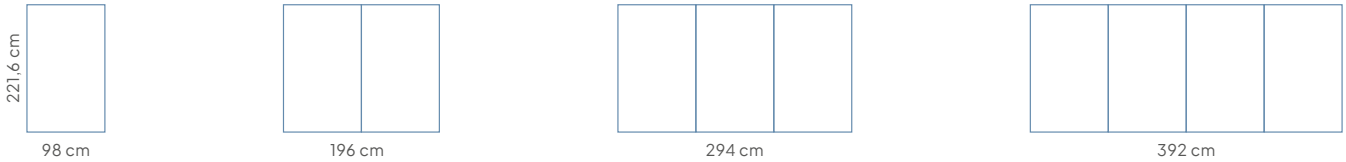

4.4 Lean Wall

Portable and mobile / Lean Wall

Writing without screws! Chameleon Lean Wall keeps walls intact. This whiteboard wall is composed of one or more panels equipped with a sturdy rubber edge at the top and bottom. This ensures excellent protection for both the wall and the floor while keeping the panels securely in place.

HG100 High Gloss | S200 Satin Snow | S201 Satin Stone | C300 Chalk Graphite | C301 Chalk Canopy

Size (cm)	Art. no.	Amount of panels

5.2 Glassboard starterkit
5.3 Scrumkit
5.4 Add-Ons

5.1 Starterkit Deluxe + accessories

Every component of the Starterkit Deluxe is magnetic. Markers, eraser sprays, and microfiber cloths can be hung anywhere on the whiteboard. For frameless whiteboards (Sharp, Curve), Chameleon offers a transparent design holder for markers as an alternative. This holder can be attached to the bottom of the board using an adhesive strip (this product is not magnetic).

* For glass boards, we offer a separate starter kit, see page 92.

Art. no.	Description
14017.113	All-magnetic accessories kit for whiteboards, 4 magnetic boardmarkers, 1 magnetic cleaning spray, 1 magnetic cleaning cloth and 10 cylinder magnets
14016.230	Magnetic markerset for whiteboards, set of 4, black, red, blue, green
14031.110	Magnetic cleaning spray for whiteboards (2× 120ml + clip)
14031.120	Refill (1 liter) for cleaning spray
14020.250	Magnetic cleaning cloths microfiber, grey, set of 3

5.4 Add-Ons

Accessories / Add-Ons

These magnetic whiteboard accessories combine style and functionality, making them a versatile addition to any whiteboard or whiteboard wall. They keep your equipment, such as post-it notes, tablets, phones, or even coffee mugs, right at your fingertips. You can also use them to display inspiring magazines or trendy plants, adding both organization and aesthetics to your workspace. Chameleon Add-ons are always useful!

The Chameleon Columniser is a practical magnetic tool for drawing straight lines with markers, which can be used as tables or scrum boards. The Chameleon Scrumkit column cards fit perfectly within these lines, adding to their utility.

The Chameleon product portfolio is an addition to any furnishing project where collaboration and creativity are important goals for end users. The whiteboards, acoustic products and pinboards are available in pCon.planner, pCon.catalog, pCon.box and pCon.facts.

pCon PLANNER

Get started with Chameleon products in pCon.planner. Place assortment product or build your own whiteboard in the custom configurator.

pCon CATALOG

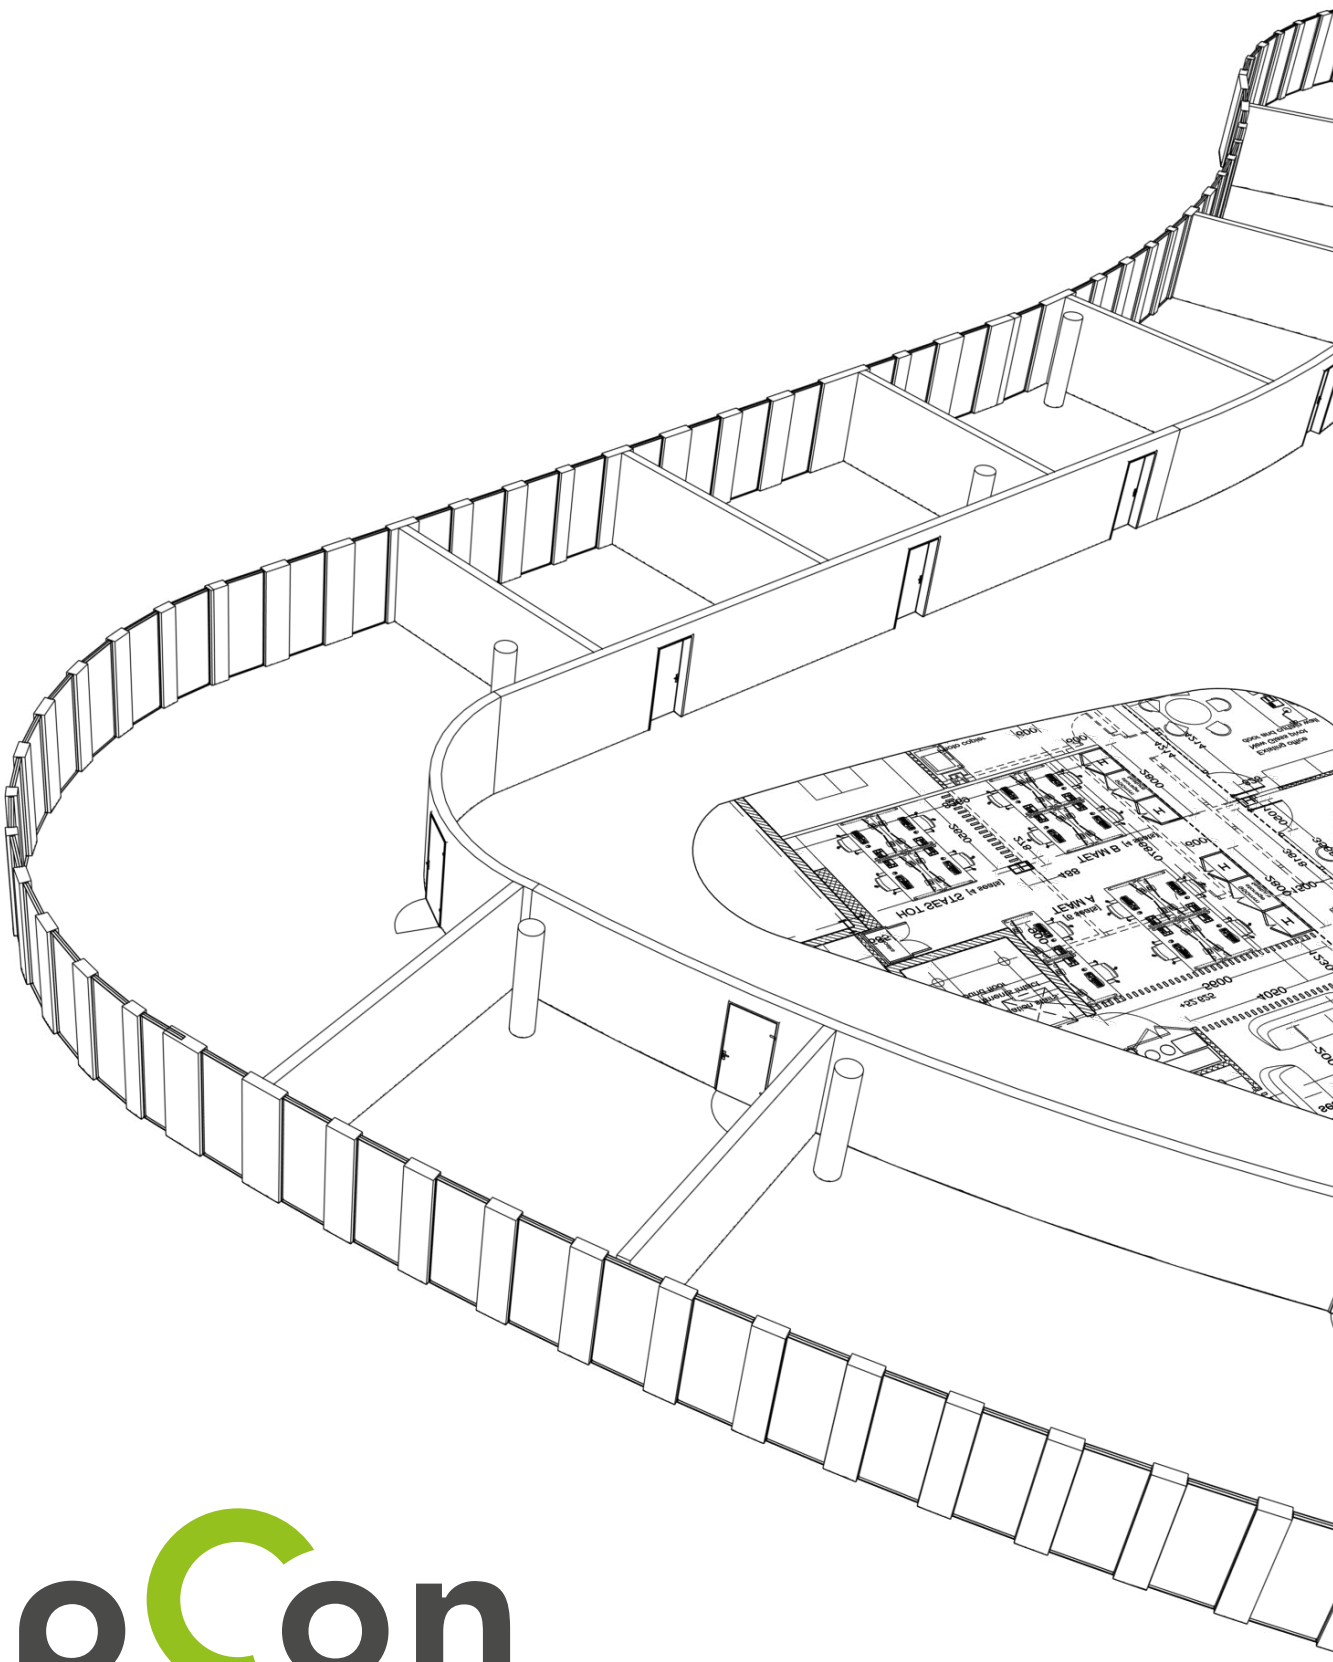

Chameleon assortment products are freely accessible and can be downloaded as 3D files in pCon.catalog.

pCon.box

pCon.box is a handy tool to configure Chameleon whiteboards and place them directly in a room via augmented reality. It is also possible, for example, to upload a 2D map in which our whiteboards can be placed in the right size.

pCon.facts

With pCon.facts you always have all the information about our Chameleon products at your disposal. Ideal for presenting products on site with images, 3D models and product information.
