STATIC SHIELDING BAG

CAUTION
contains electrostatic
sensitive devices

shielding bags open-top

Semi-transparent, heat sealable, the metallised shielding bags offer excellent protection for ESD sensitive devices. A buried layer of metallic ftlm sandwiched between an inner layer of polyethylene and an outer layer of polyester to provide protection against all static damage without exposing metal surfaces.

ESD - recycling logo and itemnumber are printed on front

Weld seam is provided with Production date.

Meets: IEC 61340-5-1, ANSI 20:20 and JEDEC STD-033

ESD Labels

ESD packaging labels are an important safety precaution for protecting ESD from damage.

- Use ESD packaging labels on all packaging that will come into contact with ESDs.
- Make sure the labels are clearly visible and easy to read.
- Do not remove the labels from the packaging until the ESDs are in their final destination.
- Store ESD packaging labels in a clean, dry environment.
- Self adhesive paper label
- Roll of 1.000

Quiet-Air

A new name that stands for silent compressed air. You work safely and without noise, due to sound levels of only 53 to 59 dBA! A complete line of affordable compressors

for light industry and hobby.

Air-cooled motors for clean and safe air.

All models have a coated tank, which prevents rusting from the inside. 4 Models with a high capacity and mobile due to the use of the wheels and handles.

1 Model especially for medical professionals, such as dentists

and chiropractors, low maintenance due to the built-in air-dryer, also as an extra guarantee for clean, dry air.

And all this in an extra sound-absorbing cabin.

In addition, we offer a very complete range of air hoses and connectors and optionally an extra micro air filter for extra protection of your valuable equipment.

Need advice on your application?

Our skilled dealers are happy to support you. Quiet-Air offers you a competitively priced complete solution!
